

THE COMPANY

In today's complex construction environment our innovative expertise, analysis and carefully crafted approach can bring security to construction process. AKSM is taking part in all stages of construction starting from the initial design through correlation and condition surveys until the final operation through construction verification survey.

AKSM was founded in 2001 in order to provide turnkey, surveying solutions in the area of construction industry. Our personnel consists of 48 professional surveyors, experienced in most types of engineering, through the training policy the company applies and the fastest available on market equipment that the company purchases, so to meet our clients' needs.
