

Company's Aims

Provision of consistent and dependable quality services.

Project delivery on time and within budget.

Meeting the needs of our clients on project basis.

- Undertaking of the whole project organization.
- Participating in all stages of construction starting from the initial design until the final operation.
- Coordination of designs studies.
- Offering expert consulting services throughout the project by incorporating special surveying applications into our services.
- Providing accurate and updated field data to all designers.
- Documentation of quantity surveys.
- Consulting on the financials, technical and operational requirements of each project.
- Working with the teams of subcontractors.
- Management of info & data flow between all of the involved parties.
- Performing all surveying works according to ISO standards.
