## BENEFITS

- Improved communication, collaboration
  & transparency
- Lower overall costs on build
- Reliable quality checked data (model against scan)
- Faster decision making, implementation of project alterations
- Less time on site, missed data, rework, construction clashes
- Fewer errors & costly mistakes, plan virtually
- Phased scan & model parts of the project when & if required
- Better sustainability, using BIM throughout the building's life.
- 'What if' plans & sequences can be optimized virtually

## MAIP

## **DELIVERABLES**

- 3D laser scan point cloud
- Leica TruView dataset accessed via web browser
- 3D intelligent BIM model
- Rendered visualizations & flythroughs
- Topographical survey of surrounding area
- 2D floor plans, elevations & sections (from BIM model)
- 3D PDFs accessed via Adobe's free Reader software
